

# Adna Advises On Two Strategic Development Projects In Guinea

*Posted on December 8, 2025*

Category: [Press](#)

Leading francophone law firm ADNA continues to contribute to Guinea's economic transformation, advising on landmark infrastructure projects in the Simandou corridor and beyond. Our Guinea team recently advised on two strategic growth projects :

1. Agribusiness innovator GoGuinée on the negotiation and execution of an investment agreement with the Republic of Guinea for the implementation of a major agro-industrial project in the Simandou Corridor.
2. Spanish renewables developer Promociones Inversolar on the negotiation and execution of a concession agreement with the Republic of Guinea and a PPA with Electricité de Guinée for the development of a 50MW solar plant in Donkeah.

These projects will help address food security and sustainable energy access for Guinea as part of its ambitious Simandou 2040 programme.
